

Human or physical geography ?

Human and physical features are things that you can see all around you. **Physical features** like seas, mountains and rivers are natural. They would be here even if there were no people around. **Human features** like houses, roads and bridges are things that have been built by people.

Maps can show:

- Just physical features (when people want to go walking in the mountains).
- Just human features (when people want to find their way around the streets in towns or cities).
- Both human and physical features (when people go walking in the countryside).
