

## All about spring

Spring is one of the four seasons.  
It is the season that comes after winter.  
Spring starts in March and ends in June.

### What happens to the animals?

Some animals, such as hedgehogs, grass snakes, frogs and toads, come out of hibernation.

### What happens to the plants?

Nature is very busy in spring and there are lots of changes. Deciduous trees grow new leaves again and many plants flower.

### What celebrations happen in spring?

Easter is an important Christian festival celebrated in spring. Holi, also called the festival of colours, is celebrated by Hindus at the start of spring.
